Via the individual cabinet

POLICIES

Attendance policy

Mandatory practice of all missed classes. Only those students who do not have passes are admitted to the modular class.

<p>Assessment policy</p>	<p>When mastering the materials of the module, the student is assigned a maximum of 5 points for each practical lesson (the grade is set in the traditional 4-point grading system). At the end of the academic year, the arithmetic mean of student performance is calculated. The maximum number of points that a student can receive in practical classes during the academic year is 120. The grade in the discipline is defined as the sum of points for current educational activities (not less than 72) and points for the final module control (not less than 48). The number of points for the current activity is calculated as the product of the arithmetic mean of the student's success in the 4-point grading system. The student is admitted to the test if he meets the requirements of the curriculum and if for the current educational activity he scored at least 72 points during practical classes. The final module control is carried out at the end of the semester in the form of a written test, with a score of "5" corresponds to 80 points, "4" - 64 points, "3" - 48 points, "2" - 0 points. In case of unsatisfactory result for the final module control, the student has the right to retake the test. Students who fail to take the test without good reason are considered to have received an unsatisfactory grade. Refusal of the student to perform the final modular task certified as an unsatisfactory answer.</p>
<p>Deadlines and course retake policy</p>	<p>In the event that the current success of the applicant is below 72 points, he may pass the final control, but will not be able to get more than 120 points for the discipline. In case of unsatisfactory result during the final control, the applicant has the right to retake the final control twice. Rearrangement is carried out according to a separate schedule, which approved by the dean's office. Students who do not appear for the module are considered to have received an unsatisfactory grade. The student's refusal to perform the task is certified as an unsatisfactory answer. The student has the right to receive an explanation of the grade obtained.</p>
<p>Assessment appeals policy</p>	<p>The results of the module and semester assessment are subject to appeal. A student must lodge an appeal to the director/dean on the day of certification or after announcing the results, but no later than the next working day. The appeal commission is established by the director/dean's order. The appeal commission's decision may change the grade in case of violations revealed during the attestation.</p>

Academic integrity policy	<p>Participants must complete all tasks according to the course requirements independently. Participants are not allowed to cheat during the written module or summative test. The assignments should not contain plagiarism, facts of fabrication, falsification, cheating. Manifestations of other types of academic dishonesty determined by the Academic Integrity policy are also unacceptable. If a teacher reveals violations of academic integrity by students during the course, the former have the right to take one of the following actions: - to reduce points by up to 40% for practical assignments; - to give recommendations for improving and resubmitting mandatory homework assignments with the reduction of points by up to 25%; - to not accept mandatory homework assignments without the right to resubmit; - set a date for retaking the written module or the summative test with a reduction of points by up to 15%; - to not allow to retake the written module or the summative test.</p>
